

PayneGroup Workflow Products Team Adds Bristol Whalen and Steve Pursell

SEATTLE, WA – March 27th, 2017. PayneGroup is happy to announce the addition of Bristol Whalen and Steve Pursell to the Workflow Products Group. This group focuses on the PayneGroup Forms and Numbering Assistants. Bristol joins as a technical account manager and Steve as a senior software developer.

Bristol was on the legal corporate affairs team at Microsoft where she was a key member of the team that brought Matter Center to market. More recently, she was part of the Office 365 team. Prior to Microsoft, Bristol was an executive assistant, then paralegal, for a small law firm in Chicago. Says Bristol, "having spent most of my career on the other side – as an end user – I know exactly how much software like Forms Assistant and Numbering Assistant would have made my business life more productive. It makes me excited to work with our products! I am looking forward to working with the PayneGroup team to bring software like this to end users and our clients."

Steve Pursell spent the past two years working as a software engineer in the health care industry. Before that, he worked at Harry & David Corporation for 16 years as a Senior Applications Programmer. Steve received a Bachelor of Science in Mathematical Sciences from the University of Washington.

"We are investing heavily in taking our products and customer support to the next level," said Donna Payne, CEO and founder of PayneGroup. "I've had the pleasure of working with both Bristol and Steve, and know each will make an invaluable impact."

About PayneGroup

PayneGroup is a leading provider of security software including the Outlook Send Assistant, which prevents Reply to All, BCC and other potential accidental disclosures, Redact Assistant, which is a redaction tool for Word and Excel files, and Metadata Assistant, the first metadata removal software on the market. The Workflow product division includes Forms and Numbering Assistants, which aid in the creation and formatting of documents. PayneGroup provides extensive professional services, ranging from software migration consulting, training and help desk services to project management and courseware development. PayneGroup has also authored 13 books on Microsoft Office. For more information about PayneGroup, see www.thepaynegroup.com or follow PayneGroup on twitter at www.twitter.com/paynegroup.
